

OmniTest

Software Testing– The Future Is Already Here

Software testing engineering is a continuous and tasks oriented process. This process involves high level methodologies, precise planning, writing of complicated test scripts and advance implementation and use of automated testing software packages.

An efficient software testing team needs to operate according to robust testing methodologies, which are supported by automated software tools to performs its day to day activities.

OmniTest, with its PASS (Parallel Automation Scripting Solution) Methodology, is a unique and innovative platform that enables parallel development of manual and automated testing scripts

OmniTest allows testing engineers to develop both manual and automated script in a parallel effort, without the need for extensive knowledge of test automation.

OmniTest – Our Unique Benefits

■ Costs Reduction

- Conducting more efficient parallel development of manual and automated test with lower costs, freeing resources to be used in other important activities
- Providing a centralized console for all scripts management

■ Optimal Coverage Of Regression Testing

- All test cases are automated, reducing the need to consider development effort costs

■ Time To Market Reduction

- Parallel development

OmniTest
With “PASS”- Parallel Automation
Scripting Solution

Proven and Quick ROI using the Omnitest Platform

Resources for Building Infrastructure

Life cycle	Traditional	Omnitest
Creating Omnitest Infrastructure	Not Required	Required
Manual Testing		
Planning	Required	Required
Writing	Required	Required
Execution	Required	Required
Test Automation		
Use of testing tools (QTP, QC)	Required	Required
Script Planning	Required	Not Required
Script Writing	Required	Not Required
Script Execution	Required	Required

Test Maintenance - Resources

Life cycle	Traditional	Omnitest
Manual Test Update	Required	Required
Automated Script Update	Required	Not Required
Automated Script Execution	Required	Required
Automation Regression Planning	Required	Not Required
